How to Create a Video

1. Preparing to Video the Singer

- a. Equipment
 - Video Camera, Camera with video ability
 - Microphone
 - Tripod
 - Lights
- b. Person to shoot the video
- c. Set –up of your video location
 - Small room – normal 8’ ceiling height
 - Make sure the light source is to the camera’s back

 - A good video has excellent audio. Types of microphones are **lavaliere** (clip-on), **hand-held**, and **shotgun** (very long and attached to camera- very sensitive). Many cameras have audio, check if an external microphone such as a lavaliere can be used. Test your internal microphone before filming. If you can use an external microphone, a lavaliere microphone is suggested. It allows for movement as you demonstrate.
- e. Lighting
 - Test the lighting in the room for a sample video shot. Will it wash out the singer or cast shadows? The lighting should be parallel to the camera towards the film area.

2. Lights – Camera – ACTION

- b. After a few practice runs, now shoot a sample
- c. Review the video
